

Job Description

Junior Frontend Developer

3 simple asks

- Be responsible for complete day to day operations of the brands you are working on from website development perspective
- Work very closely with the Tech Head and Web team manager to help them pitch and win new businesses for the agency
- For brands already working with WRM, create world-class websites and solutions

What do we need

- Minimum work experience – 2-3 years. Agency / Ecommerce Background is preferred
- Skills – WordPress, jQuery, Angular, Node, React JS and Vue JS
- Responsiveness of website and applications across projects and eye for details is a must have
- Should have skill set to transform PSD design to a full HTML site
- Good knowledge about the latest design tools and good understanding of UI/UX concepts
- Understanding and server setup - AWS, Cloud based servers, and Others (is a plus)
- Server understanding and setup experience - Curl, cPanel, Putty, MySQL issues and solution finding

If onboard, what will your day look like

- Being neck deep busy in working on Frontend and Backend and develop websites of WRM projects
- Spending time in researching and learning new technologies in entire frontend techstack along with exposure to backend - world of web and applications of WRM
- Suggesting tech solutions for the required projects
- Create, manage and maintain the websites created at WRM
- Work closely with the clients who have given their SEO mandate to WRM and help them achieve their goals
- Goal oriented achievers' technology geek who can redefine project approach and solutions
